HudsonIT introduces IT Partner Services IT Consulting Services Offering complete Professional Services Package

Woodbridge, NJ – HudsonIT today announced the availability of the IT Partner Service for its Enterprise and Service Provider clients.

Having a *HudsonIT Partner* as a strategic member of your management team provides a unique value proposition for your organization: reduce the cost and risk of an individual hire and provide access to the extensive intellectual capital resources of your partnership with HudsonIT. Our Partner will serve as a trusted advisor on the design, purchase, and deployment of IT services and technology, and they are supported by the other HudsonIT Partners who share the knowledge, experiences, and best practices through our Knowledge Base.

The scope of services that are provided by our Partners include **IT Planning**:

- IT Strategic Plan Development
- Process and Methodology Design and Development
- Budget, Resource and Capacity Planning
- Architectural Reviews
- Data Architecture, Integrity and Security

Our Partners will assist in providing **IT Governance Services**:

- Establish Program Management Office
- Increase Project Management Effectiveness
- Vendor and RFP Management Services
- Investor-related Services such as fund raising, planning, ROI analysis

The services continue through **IT Execution Phase**:

- Development of Standards, policies and procedures
- Process review, documentation and adherence monitoring
- Content and Release Management

In today's challenging environment, we understand that most CIOs are expected to accomplish more with less resources. Experienced CIOs and IT Management personnel who bring a balance of technology and business acumen to the problems are hard to find and even harder to retain. Some business conditions could benefit from a CIO Partner,

but could not afford a full-time CIO. HudsonIT's Partner Services can help your organization meet these challenges.

A HudsonIT CIO Partner can provide these services to your organization on a fixed price basis. Or, we may be employed by your organization as a full-time, interim, or part-time Chief Information Officer or serve an executive role on a specific project basis.
