**HudsonIT Teams With Allegent Technology Group to Resell and  
Deliver Threat Management Solutions  
Becomes Value Added Reseller of SolventView™ software  
capabilities**

**Woodbury, NY**, September 10, 2004 – Allegent Technology Group, provider of next generation security management software, today announced that HudsonIT, LLC., an IT Infrastructure and Network Security firm, has become a Value Added Reseller (VAR) of Allegent's SolventView™ threat management software. HudsonIT will resell and integrate SolventView™ into customer networks, leveraging its expertise in meeting the needs of enterprise IT organizations.

SolventView™ threat management software helps enterprises avoid threats and incidents by coordinating and simplifying the monitoring and management of vulnerabilities, security events, devices, and assets. SolventView™ provides critical analysis and response capabilities through an integrated solution that puts important network security protections in place quickly. The result is reduced risk and an improved security posture.

"SolventView™ minimizes the impact of security threats, providing significant business benefits to our clients," said Steve Queroli, HudsonIT's Managing Partner. "HudsonIT's and my personal involvement with the Allegent team goes back several years, so we know the product and the markets served. By combining the SolventView offering with our IP Address and Inviato Access Management solutions, HudsonIT offers the market an integrated IP Infrastructure and Network Security platform to meet their regulatory and internal needs. SolventView's groundbreaking security threat management solutions are unique in the marketplace and we are excited about expanding our relationship with Allegent."

"This agreement builds on our existing partnership to provide outstanding consulting and engineering services to our customers," said G. Edward Kalbaugh, Allegent's Chief Operating Officer. "Allegent's technology, combined with HudsonIT's engineering

expertise, allows us to provide high quality, accelerated customer implementations. A strategic relationship with HudsonIT allows us to respond to the increasing market demand for security solutions."
